

RESUME COMPARISON

Before vs After AI Optimization

Previous ATS Score

58/100

ATS SCORE IMPROVEMENT

📈 +31 POINTS

Optimized ATS Score

89/100

	ORIGINAL RESUME	OPTIMIZED RESUME
 PROFESSIONAL SUMMARY	- Summary was good but lacked clarity and impact - Did not immediately highlight key strengths and domain focus	- Strong, focused, and outcome-driven professional summary - Clearly highlights AI/ML, Full Stack Development, and internship experience - Better alignment with target roles (AI/ML Engineer, Data Analyst, Full Stack Developer)
 FORMATTING & READABILITY	- Inconsistent formatting styles - Irregular section spacing - Bullets were long and less scannable	- Clean, consistent, and ATS-friendly formatting - Clear section separation and hierarchy - Short, scannable bullet points enhance readability
 KEYWORD OPTIMIZATION	- Fewer role-specific keywords - Limited use of industry-standard terminology - Lower chances of passing ATS filters	- Integrated high-impact keywords (AI/ML, Machine Learning, Data Analysis, Scikit-learn, Streamlit, FastAPI, SQL, IoT) - Better alignment with job descriptions - Higher ATS relevance and visibility
 SECTION ORGANIZATION	- Experience and projects were less structured - Mixed placement of key information - Harder for recruiters to scan	- Logical and recruiter-friendly flow - Consistent section order: Summary, Education, Experience, Projects, Skills, Certifications, Achievements - Easier navigation and quick information access
 EXPERIENCE PRESENTATION	- Internship bullets were basic and general - Limited focus on tools and technologies used - Less impact on responsibilities	- Action verbs used to start bullets - Clear mention of tools, technologies, and workflows - End-to-end ML pipeline and deployment experience highlighted
 SKILLS PRESENTATION	- Skills section was basic and scattered - Not grouped by categories - Some important tools missing (e.g., Streamlit, FastAPI)	- Skills grouped by category (Languages, Frameworks, Databases, Tools, etc.) - Added important technologies - More comprehensive and ATS-optimized skills list
 OVERALL IMPACT	- Good content but lacked optimization - Lower ATS compatibility - Moderate recruiter impact	- Professional, impactful, and ATS-optimized - Higher chances of recruiter shortlisting - Strong positioning for AI/ML and Full Stack roles

TOP 5 IMPROVEMENTS MADE

1  STRONGER SUMMARY Clear, focused, and role-aligned summary that highlights key strengths.	2  BETTER STRUCTURE Improved section order and formatting for easy scanning and ATS compatibility.	3  KEYWORD OPTIMIZATION Added high-impact keywords to increase ATS score and job relevance.	4  IMPACTFUL BULLETS Rewrote bullets using action verbs with clear focus on tools and outcomes.	5  ENHANCED SKILLS Organized skills by category and included in-demand technologies for better visibility.
--	---	--	--	---

RESULT: Higher ATS Score • Better Readability • Stronger Recruiter Appeal • Increased Shortlisting Chances

Summary

Enthusiastic BCA undergraduate with strong practical experience in Machine Learning, Python, SQL, Flask, Supabase, and web technologies. Completed an AI Machine Learning internship with hands-on exposure to data preprocessing, model workflows, and AI-driven solutions. Built AI-based systems, and IoT projects, including AEGISAI-Autonomous Defence and Self-Healing System and an RFID-based Smart Gas Leakage Detection System. Strong foundation in Data Structures, DBMS, and problem-solving, seeking an entry-level AI/ML Engineer, Data Analyst, or Full Stack Developer.

Education

Bachelor of Computer Applications	Aug 2023 – May 2026
National Degree College, Karnataka —	CGPA: 9.7 / 10.0
Pre-University Course	May 2021 – Apr 2023
The National Pre-University College, Bagepalli, Karnataka State Board —	Percentage: 92.5%

Experience

AI & ML Intern (Aqmenz Automation Pvt. Ltd.)	Apr 2026 – May 2026
- Worked on machine learning workflows involving data preprocessing, visualization, and automation-based monitoring concepts. - Assisted in implementing ML models, backend testing workflows, and dashboard-oriented monitoring solutions using Python libraries. - Gained practical exposure to Scikit-learn, Pandas, Matplotlib, Streamlit, and real-time system analysis concepts.	

Technical Skills

Programming Languages:	Python, Java, C
Web Technologies:	HTML, CSS, JavaScript, Flask
Libraries / Frameworks:	Pandas, NumPy, Matplotlib, Scikit-learn
Development Tools:	Git, GitHub, VS Code, Jupyter, Netlify
Databases:	MySQL, Supabase
Hardware / IoT:	Arduino, Microcontroller Systems
AI Tools:	ChatGPT, Gemini, Claude
Core Concepts:	Data Structures, Algorithms, DBMS

Projects

• AEGISAI – Autonomous Defence and Self-Healing System (Python + FastAPI + ML)	Link
- Developed a real-time system for monitoring CPU, memory, and running processes. - Applied Isolation Forest algorithm to detect abnormal system behavior. - Automated process control to improve system performance and stability. - Built a dashboard for real-time monitoring, alerts, and process management.	
• RFID-Based Smart Gas Leakage Detection System — Microcontroller + IoT	Link
- Developed a real-time gas leakage detection system using Arduino and MQ gas sensor. - Implemented RFID-based secure access for authorized gas valve operation. - Automated gas valve control using a servo motor for improved safety. - Integrated buzzer and LCD alerts for instant gas leakage notifications.	

Certifications

- Innovative Design Thinking** – IoT fundamentals, problem identification, prototyping, and innovative solution design
- Machine Learning** – Data wrangling, visualization, and predictive modeling
- Coolest Project** – Arduino-based smoke detector
- Advanced Excel & Power BI** – Data analytics and dashboards

Achievements

- Student Coordinator for PPT Competition in BCA Fest; leadership and teamwork.
- Awarded for securing highest marks in BCA 2nd year Degree Examination (2024–2025) under Bangalore North University.

PROFESSIONAL SUMMARY

Motivated BCA undergraduate (CGPA 9.7/10) specializing in AI/ML, Full Stack Development, and Data Analysis. Completed an AI & Machine Learning internship with end-to-end model workflow experience — data preprocessing, model training, and deployment using Python, Scikit-learn, and Streamlit. Built production-style AI and IoT systems. Seeking an entry-level role as AI/ML Engineer, Data Analyst, or Full Stack Developer.

EDUCATION

Bachelor of Computer Applications (BCA) — National Degree College, Karnataka *Aug 2023 – May 2026*
CGPA: 9.7 / 10.0 | Awarded Highest Marks in 2nd Year (2024–2025) under Bangalore North University

Pre-University Course (PCMC) — The National Pre-University College, Bagepalli, Karnataka *May 2021 – Apr 2023*
State Board — Score: 92.5%

EXPERIENCE

AI & Machine Learning Intern — Aqmenz Automation Pvt. Ltd. *(Apr 2026 – May 2026)*

- Executed end-to-end ML workflows including data preprocessing, cleaning, and visualization using Python, Pandas, NumPy, and Matplotlib.
- Developed and evaluated classification, regression, and customer segmentation models using Scikit-learn.
- Built and deployed interactive real-time prediction dashboards using Streamlit.
- Gained hands-on experience across the full ML pipeline from data ingestion to model deployment.

PROJECTS

AEGISAI – Autonomous Defence and Self-Healing System (Python, FastAPI, Machine Learning)

- Engineered a real-time system monitoring CPU, memory, and running processes for anomaly detection.
- Applied Isolation Forest algorithm to identify and auto-remediate abnormal system behavior.
- Built a live dashboard for monitoring, alerting, and automated process management.

RFID-Based Smart Gas Leakage Detection System (Arduino, IoT, Microcontroller)

- Designed a real-time gas leakage detection system using Arduino and MQ gas sensor with RFID-based secure valve access.
- Automated gas valve control via servo motor; integrated buzzer and LCD alerts for instant notifications.

TECHNICAL SKILLS

Programming Languages: Python, Java, C

Web Technologies: HTML5, CSS3, JavaScript

Frameworks & Libraries: Flask, FastAPI, Pandas, NumPy, Matplotlib, Scikit-learn, Streamlit

Databases: MySQL, MongoDB, Supabase

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, Netlify

Hardware / IoT: Arduino, Microcontroller Systems

Core Concepts: Data Structures, Algorithms, DBMS, Object-Oriented Programming

CERTIFICATIONS

- Innovative Design Thinking – IoT fundamentals, problem identification, prototyping, and solution design
- Machine Learning – Data wrangling, visualization, and predictive modeling
- Advanced Excel & Power BI – Data analytics and dashboard development
- Coolest Project Award – Arduino-based smoke detector

ACHIEVEMENTS

- Awarded Highest Marks in BCA 2nd Year Degree Examination (2024–2025) under Bangalore North University.
- Student Coordinator for PPT Competition at BCA Fest — demonstrated leadership and cross-team collaboration.
